Technologies

- DAB+/ DAB/ FM reception
- Highly tactile switch buttons
- Acoustic signal integrated in the operation menu
- Text to speech function via usb connection
- Removable Telescopic Antenna / Connector for Roof Aerial
- Alarm Clock and usb connection for software-updates
- Dynamic label

The new radio NOXON dRadio 110 is created based on special requirements of visually impaired and it contains all the functions, which makes listening to radio enjoyable.

The main changes in comparison to the NOXON dRadio 100, which is already on the market, is the highly tactile switch buttons, integrated acoustic signal in the operations menu and the text to speech function, which was developed for the visually impaired, respectively.

The NOXON dRadio 110 is handicapped accessible (via usb stick for text to speech function)

Text to speech function: Just download the software for the function text to speech from the website www.terrateg.com for free and save it (unzipped) on an usb stick. Plug your usb stick into the usb port of the dRadio 110 and the text to speech function starts automatically.

What is Digital Radio?

Digital Radio is the latest standard for radio reception via antenna. It takes analogue FM radio into the digital era. It offers a greater choice of programmes, new services, an excellent sound quality, simple operation and no search for frequencies. All these features can be enjoyed without any geographical limitation within a country.

NOXON dRadio110
