TV Entertainment on the PC like never before

Treat yourself to crystal clear, flicker-free image quality, real stereo sound, and the utmost in convenience. Thanks to the added remote control, you can now enjoy television on the PC from your recliner.

The station search guides you through all available channels and identifies them automatically. On top of that, the multi-station preview provides images of all stations at a glance while you can scale the image size yourself: The selection is yours: from a parallel running window to full screen.

Capture single images, video clips or a complete evening TV program directly onto your hard disk! TerraTec Cinergy supports nearly all current audio/video codecs such as DivX.

Timer-controlled recordings in VCD, SVCD or DVD are child's play with the accompanying video recorder software InterVideo WinDVR. Edit your movies and permanently archive them with almost any available CD/DVD burner software.

Call up your personal TV magazine on the Internet with the push of a button and gain a quick and convenient overview of the program. But you can obtain brand-new information about the program even without the Internet: using integrated high-speed video text with page buffer, which can be placed across the broadcast TV image, you can browse through the supplemental program and immediately obtain free information!

Station selection, volume, recording—lean back and control all Cinergy functions from the couch! The accompanying remote control is freely and easily programmable and, in addition, can control almost every Windows software! In addition to antennas, cable networks or satellite receivers, the Cinergy can also be used with camcorders or DVD players. Your existing sound card can be interconnected without problems thanks to the accompanying cable.

With TerraTec's Cinergy 400 TV, your experience TV entertainment on the PC like never before! TerraTec Cinergy 400 TV—the perfect synthesis of television and PC!

Technical Details

Keyfeatures

- Stereo TV on your PC
- Remote control for TV software and other applications
- Timer-controlled recording in VCD, SVCD or DVD format
- Time-delayed playback of a running recording (in VCR software)
- Video recording using common compression methods (DivX, etc.)
- SVHS and video input for external devices
- Station search with automatic station identification
- Multi-station preview for all available stations
- Interactive high-speed videotext with page cache
- Cable- and satellite-enabled TV tuner

System Requirements

- Pentium II or higher
- 64 MB RAM
- Windows 98 SE, ME, 2000 or XP
- 1 free PCI 2.1 slot
- Active speakers or sound card
- CD-ROM drive (to install drivers/software)
- PCI or AGP VGA card with DirectDraw drivers and video overlay support

Recommended System

- Pentium III, AMD Athlon processor or higher
- 128 MB RAM
- Windows 98 SE, ME, 2000 or XP
- 1 free PCI 2.1 slot

- Sound card
- CD-ROM drive (to install drivers/software)
- AGP graphics card with DirectDraw drivers and video overlay support

The recording of video data requires increased processor/hard disk performance.

- Your hard disk should support the DMA mode.
- For recording in VCD (MPEG-1) format, we recommend at least a 500 MHz Intel Pentium or AMD processor.
- For recording in MPEG-2 format, we recommend at least a 650 MHz Intel Pentium III or 650 MHz AMD Athlon processor.

Package Content

- TerraTec Cinergy 400 TV PCI card
- Infrared Remote Control incl. batteries
- Infrared receiver
- Audio loopback cable
- CD-ROM with drivers and Bundlesoftware
- Quickreference guide
- Online manual
- Service card
- Registration card

Art.Nr.:	10097
EAN-Code:	4017273100975
Warranty:	24 months
