

Television, Radio and Video on your PC

So, you want to view your favourite TV programme on your monitor with needle-sharp clarity? You don't want to have to do without FM stereo radio on your PC? Or you want to immortalize the best classic movies on your hard drive, CD or DVD? Easy! Simply convert your computer into a high-performance multimedia center for television, radio and video recording with the TerraTec Cinergy 600 TV.

And all this without the nuisance of having to search for stations, because the automatic tuning feature finds all available TV channels, including their station names, in just a blink of the eye. The Multi-Channel Preview feature puts a complete overview of all running TV programmes on your screen at the push of a button.

Found your favourite? Then lean back and enjoy the flicker-free picture at any size you choose. Stand up to switch channels? Of course not! Thanks to the remote control unit as part of the package, you can control all functions from the comfort of your couch—even other Windows applications! By the way, the TerraTec Cinergy 600 TV Radio also offers high-speed Videotext, of course. And, at the touch of a button, you can check out your own, personal TV journal—on the Internet.

The TerraTec Cinergy 600 TV Radio offers everything you need for recording videos on your PC, including convenient timer controls for recording individual programs. In addition, the full version of WinDVR gives you powerful video recording software so that you can record your videos at top quality onto your hard drive or, using standard CD-DVD burner software*, onto VCD, SVCD and DVD. WinDVR supports all prevalent audio and video formats (even DivX!).

Whether music, information or news: The TerraTec Cinergy 600 TV Radio also provides you with top reception for everything on FM radio. Also, so that you can find all your broadcasting stations right away, the TerraTec Cinergy 600 TV Radio is equipped with full Radio Data System functionality (RDS).

* burner software is not included in the scope of delivery

Technical Details

Keyfeatures

- Stereo TV and FM-Radio with RDS on the PC
- Remote control for TV- & Radio- Software and other applications
- Timer-controlled recording in VCD, SVCD or DVD format
- All RDS abilities and scheduled Radio recordings

- Video recording using common compression methods (DivX, etc.)
- SVHS and video input for external devices e.g. Satellite Receivers, DVD-Player, Camcorder, etc.
- Station search with automatic station identification
- Multi-station preview for all available TV-stations
- Interactive high-speed videotext with page cache
- High quality terrestrial & cable- enabled TV/Radio tuner

Software

- TerraTec TV- and Radio Software
- TerraTec Scheduler
- Full version Intervideo WinDVR Recordersoftware

System requirements

- Pentium II or higher
- 64 MB RAM
- Windows 98 SE, ME, 2000 or XP
- 1 free PCI 2.1 Slot
- Active Speakers or soundcard
- CD-ROM drive (for driver and software installation)
- PCI or AGP VGA Card with DirectDraw Drivers and Video-Overlay-Support

System recommendation

- Pentium III, AMD Athlon Processor or higher
- 128 MB RAM
- Windows 98 SE, ME, 2000 or XP
- 1 free PCI 2.1 Slot
- Soundcard
- AGP Graphics card with DirectDraw Drivers and Video-Overlay Support

The recording of video data requires increased processor/hard disk performance

- Your hard disk should support the DMA mode.
- For recording in VCD (MPEG-1) format, we recommend at least a 500 MHz Intel Pentium or AMD processor.
- For recording in MPEG-2 format, we recommend at least a 650 MHz Intel Pentium III or 650 MHz AMD Athlon processor.

Art.No.:	6010
