

CINERGY S PCI

DVB-S Tuner & Digital video recorder

- DVB-S TV and radio tuner
- Supports MPEG2 HD
- Digitalvideo recorder
- Incl. Remote control

Experience the variety of entertainment available on your computer. With the Cinergy S PCI, you can now turn your computer into a full-fledged TV with radio capabilities. Getting to your first TV show takes just a few steps. Simply plug the PCI card into an available slot and install the TV cable (digital LNB required!) and software. Done! Now you're receiving hundreds of TV channels from all over the world in DVB-S standard, which you can save to your hard drive, edit and burn with just a few clicks of the mouse.

Digital video recorder

Record all programmes in highest MPEG 2 quality with the push of a button or via timer. You have the choice between manual and timed recording—even remote programming via Internet is supported. The computer boots up from standby or sleep mode precisely when the chosen television show begins and then saves it on your hard drive automatically. No matter how you plan your recordings, they can be viewed immediately, even while the recording is in progress.

Perfect television viewing on your computer

The Cinergy S PCI has even more capabilities: Automatic optimisation of aspect ratio, picture-in-picture function, Dolby digital (AC3) recording, teletext and subtitles, and user-defined favourites lists (genre, location), multi-tuner support, readily available help functions. Sleek, and easy on your computer's resources, user-friendly, TERRATEC has finally made the experience of watching television on your computer both real and complete! With the all-round solution from TERRATEC, including remote control, you can enjoy perfect ease of use that is otherwise only available with expensive, hard-drive-based receivers.

Technical Details

Features

- Digital TV- and radio reception via satellit (DVB-S)
- Remote control
- analogue video input (S-Video, Composite)
- Digital video recorder
- Picture in Picture within a transponder
- EPG, Teletext and TimeShifting

System requirements

- 2,0 GHz Intel or AMD CPU
- 1 GB RAM
- One free PCI Slot
- Internet connection for driver and software download
- Windows XP SP3 (32 Bit) / Windows Vista SP2 (32/64 Bit) / Windows 7 SP1 (32/64 Bit) / Windows 8 (32/64 Bit)
- Digital TV reception (DVB-S/DVB-S2) via Satellite

Scope of delivery

- Cinergy S PCI
- Infrared receiver
- Remote control
- Quick setup guide
- Service card
