

Burn all of your DV movies on CD and DVD!

Grabster DV 200 and the full version of MovieFactory 3 are the perfect team to make great VCDs, SVCDs and DVDs from your DV camcorder material with just a few clicks. Transfer your movies via FireWire™ on your PC. Use the built-in video and slideshow editing features and fully customisable motion menus to save your precious memories in premium quality on CD and DVD.

1 Import

Grabster DV 200 lets you transfer videos in DV format to your PC in realtime and without any loss of quality. Experience video to disc in one click - the fastest way to copy your movies to disc, without having to store the video onto your hard drive first! The two remaining interfaces can be used to connect up to 62 further FireWire™ devices like hard disks, scanners, mobile data carriers etc.

2 Express

Now your creativity is in demand! Just choose and modify a suitable menu template, and you'll make a professional-looking DVD in a few minutes! Try Multi-trim to easily get rid of unwanted video. Or add the excitement of full motion menus. Make your slideshows come to life - create transitions between photos and add titles to pictures. Even replace audio with music or voice-overs.

3 Impress

In no time at all you can produce a professional DVD for your PC or DVD player and TV set. Try One Click Disc Copies to easily share your high quality videos – surprise your friends with a self-made movie! You can even give your CDs and DVDs an appealing finish with exciting, print-quality labels.

Complete right from the start!

Grabster DV 200's scope of delivery includes everything you'll need for a direct and successful start into the world of DVD creation. In most cases there's no need to buy any further accessories!
